Alerting Abstract JP A

NOVELTY - Resin composition pellets(I) comprising (A) saponified product(s) of ethylene/vinyl acetate copolymer, (B) polyamide resin and (C) fatty acid metal salt(s) which is distributed in (I) and on the surface of (I) are claimed.

USE - (I) and (II) are useful as material for preparation of sheets, wraping films, tubes, bottles, caps, trays etc, especially, (I) and (II) are useful as material for preparation of laminated films for retort pouchs.

ADVANTAGE - (I) and (II) show good moldability, give molded articles having good appearance, resistance to heat and gas barrier properties.

Technology Focus

POLYMERS - Resin composition pellets(II) comprising (A) 100 parts by weight, (B) 3-100 parts by weight, (C), (D) sodium acetate and/or (E) boric acid are claimed, also. Preferred materials are follows: (A) saponified product(s) of ethylene/vinyl acetate= 20/80-60/40(mol/mol) copolymer with MFR 0.5-50 g/10 min to become degree of saponification to 99 mol% or more,

(B) nylon 6, nylon 12, nylon 6/12, nylon 6/66 etc, (C) 12-30C fatty acid(s) and/or its magnesium-, calcium- or zinc-salt(s). (I) is prepared by blending (A) 100 parts by weight, (B) 3-100(optimally 7-20) parts by weight, (C)(0.01-0.1 part by weight per 100 parts by weight of (A) and (B)) and optional additive(s)(e.g. antioxidant, antistatic agent, antiblocking agent, filler etc) and pelletising the mixture.
